SUMMARY

I have been a front-end developer since 2009. I have spent a significant amount of time freelancing, as well as working in startups and product companies. Recently, I have been using React, but I have also worked with VueJS and Flutter. I love web design and everything related to it, with a particular passion for optimization. I am open to working in product teams. I find great satisfaction in knowing that my work brings value to the end user.

TECHNICAL SKILLS

React • Redux toolkit • Next.js • Vite • SWR • Vitest • Framer • Motion • CSS • PostCSS • SCSS • LESS
Emmet • CSS modules • BEM • JavaScript • ES6 • ESLint • StyleLint • Prettier • Vue.js • TypeScript • HTML

EXPERIENCE

Omni HR / Frontend Developer 12/2023 — Current

A lifecycle automation product for the HR professional. Current Product Support. Implementation of new functionality. The product is written in React, with Mui component library. Interaction with an international, distributed team. Building development processes in the team.

Heroes.camp / Frontend Developer 02/2021 — 08/2023

An educational course for product managers, marketers, leaders, and business owners. Primarily, it involves supporting the current platform and concurrently developing a new one. The foundation of this is the idea of creating quizzes using Figma, followed by exporting them into a fully interactive application using a plugin.

High Rock On Mars / Frontend Developer 06/2020 — 01/2021

Development of the client part of the product in Vue.js using Element, as well as component development. Development of a mobile application using Flutter.

Olimp Tech / Frontend Developer 07/2018 — 10/2019

Working on the company's internal projects, using the React.js stack. Developing PWA (Progressive Web Apps) and SPA (Single Page Applications). One project is a mobile application for the South African market, related to betting. The other project, more marketing-oriented, aims to attract new players, also related to betting, in the form of an SPA.

PLAYR.gg / Frontend Developer 03/2018 — 01/2019

Working on the development of the client and admin parts of the project, using the Vue stack. The project aims to attract new viewers to streams through giveaways. It's a convenient tool for the stream author and for users, who are required to repost or share the broadcast, or subscribe.

Bakker Research International Limited / Frontend Developer 06/2017 — 05/2018

Bash Today / Frontend Developer 02/2015 — 11/2015

Self-Employment / Freelancer 08/2009 — 2/2015
