EXPERIENCE

Simplenight Travel SaaS platform / Frontend Developer 12/2024 — Current

Developed a white-label travel platform for hotel, flight, and restaurant bookings, etc. Responsible for supporting the core product, building the admin panel and mobile application, and engineering backend services with NestJS. Significantly improved project performance on Next.js and led the migration to a centralized UI Kit via Storybook to ensure design consistency and faster development cycles.

Omni HR HRIS provider / Frontend Developer 12/2023 — 08/2024

A lifecycle automation product for the HR professional. Current Product Support. Implementation of new functionality. The product is written in React, with Mui component library. Collaborated within a distributed international team. Building development processes in the team.

Heroes.camp EdTech / Frontend Developer 02/2021 — 08/2023

An educational course for product managers, marketers, leaders, and business owners. Primarily, it involves supporting the current platform and concurrently developing a new one. The foundation of this is the idea of creating quizzes using Figma, followed by exporting them into a fully interactive application using a plugin.

High Rock On Mars Digital security / Frontend Developer 06/2020 — 01/2021

Development of the client part of the product in Vue.js using Element, as well as component development. Development of a mobile application using Dart, Flutter.

Olimp Tech Sports betting company / Frontend Developer 07/2018 — 10/2019

Working on the company's internal projects, using the React.js stack. Developing PWA and SPA. One project is a mobile application for the South African market, related to betting. The other project, more marketing-oriented, aims to attract new players, also related to betting, in the form of an SPA.

PLAYR.gg Gaming creator engagement platform / Frontend Developer 03/2018 — 01/2019

Working on the development of the client and admin parts of the project, using the Vue stack. The project aims to attract new viewers to streams through giveaways. It's a convenient tool for the stream author and for users, who are required to repost or share the broadcast, or subscribe.

Bakker Research No-code landing page builder / Frontend Developer 06/2017 — 05/2018

Bash Today Airbnb for event spaces / Frontend Developer 02/2015 — 11/2015

Self-Employment / Freelancer 08/2009 — 2/2015
